### AMENDMENT

#### Amendments to the Claims:

The listing of claims will replace all prior versions, and listings, of claims in the application:

#### Listing of Claims:

1. (Currently Amended) A method for facilitating international travel, the method comprising the steps of:
  - creating, in response to a signal communicated through an internet-enabled device coupled for data communications through at least one internet connection to an international travel server, a travel record to be stored within the international travel server;
  - creating, in dependence upon the travel record, an immigration admissions form for a destination country;
  - validating, by the international travel server separately from any immigration computer of the destination country, travel described in the travel record against admissions rules stored in an admissions rules database; and
  - submitting the immigration admissions form to an immigration admission forms database for the destination country.
2. (Original) The method of claim 1 wherein the internet-enabled device is a workstation in a kiosk at an airport.
3. (Original) The method of claim 1 wherein the internet-enabled device is a workstation installed in the back of a passenger chair in an airplane.

AUS20010333US1  
M/S AF

4. (Original) The method of claim 1 wherein the internet-enabled device is a personal computer.
5. (Original) The method of claim 1 wherein the internet-enabled device is a hand-held personal data administrator.
6. (Original) The method of claim 1 wherein the at least one internet connection is wireless.
7. (Original) The method of claim 1 wherein the travel record comprises travel data describing travel, the travel data including identification of a traveler and of a destination country.
8. (Original) The method of claim 1 wherein the international travel server is a software application installed and operating on one or more computers, the software application further comprising software routines storing and retrieving travel records, validating travel described in travel records against admissions rules stored in admissions rules databases, and submitting to immigration databases immigration admissions forms prepared in dependence upon the travel records.
9. (Original) The method of claim 1 wherein creating in dependence upon the travel record, an immigration admissions form for the destination country, further comprises reading travel data from a travel record and inserting the read travel data into an immigration admissions form.
10. (Original) The method of claim 1 wherein submitting the immigration admissions form to an immigration admission forms database for the destination country further comprises communicating the forms as electronic data communications through at least one internet connection.

AUS20010333US1  
M/S AF

11. (Cancelled)
12. (Previously Presented) The method of claim 1 wherein validating the travel records further comprises comparing the travel described by travel data in the travel record to admissions rules governing the travel described by the travel data in the travel record and reporting to the traveler through the internet-enabled device a result of the comparison.
13. (Original) The method of claim 12 further comprising storing the result of the comparison in the travel record.
14. (Original) The method of claim 1 wherein the travel record comprises a travel record form, wherein the travel record form is dependent upon admissions rules.
15. (Currently Amended) A system for facilitating international travel, the system comprising:
  - means for creating, in response to a signal communicated through an internet-enabled device coupled for data communications through at least one internet connection to an international travel server, a travel record to be stored within the international travel server;
  - means for creating in dependence upon the travel record, an immigration admissions form for ~~the~~ destination country;
  - means for validating, by the international travel server separately from any immigration computer of the destination country, travel described in the travel record against admissions rules stored in an admissions rules database; and
  - means for submitting the immigration admissions form to an immigration admission forms database for a destination country.
16. (Original) The system of claim 15 wherein the internet-enabled device is a

AUS20010333US1  
M/S AF

workstation in a kiosk at an airport.

17. (Original) The system of claim 15 wherein the internet-enabled device is a workstation installed in the back of a passenger chair in an airplane.
18. (Original) The system of claim 15 wherein the internet-enabled device is a personal computer.
19. (Original) The system of claim 15 wherein the internet-enabled device is a hand-held personal data administrator.
20. (Original) The system of claim 15 wherein the at least one internet connection is wireless.
21. (Original) The system of claim 15 wherein the travel record comprises travel data describing travel, the travel data including identification of a traveler and of a destination country.
22. (Original) The system of claim 15 wherein the international travel server is a software application installed and operating on one or more computers, the software application further comprising software routines storing and retrieving travel records, validating travel described in travel records against admissions rules stored in admissions rules databases, and submitting to immigration databases immigration admissions forms prepared in dependence upon the travel records.
23. (Original) The system of claim 15 wherein means for creating in dependence upon the travel record an immigration admissions form for the destination country, further comprises means for reading travel data from a travel record and means for inserting the read travel data into an immigration admissions form.

AUS20010333US1  
M/S AF

24. (Original) The system of claim 15 wherein means for submitting the immigration admissions form to an immigration admission forms database for the destination country further comprises means for communicating the forms as electronic data communications through at least one internet connection.
25. (Cancelled)
26. (Previously Presented) The system of claim 15 wherein means for validating the travel records further comprises means for comparing the travel described by travel data in the travel record to admissions rules governing the travel described by the travel data in the travel record and means for reporting to the traveler through the internet-enabled device a result of the comparison.
27. (Original) The system of claim 26 further comprising means for storing the result of the comparison in the travel record.
28. (Original) The system of claim 15 wherein the travel record comprises a travel record form, wherein the travel record form is dependent upon admissions rules.
29. (Currently Amended) ~~A computer program product for facilitating international travel, the method comprising:~~ A computer program product embodied on a computer-readable medium, the computer program product comprising computer-implementable instructions for causing a computer to carry out the steps of:  
~~a recording medium;~~  
~~means, recorded on the recording medium, for creating, in response to a signal~~ communicated through an internet-enabled device coupled for data communications through at least one internet connection to an international travel server, a travel record to be stored within the international travel server;

AUS20010333US1  
M/S AF

~~means, recorded on the recording medium, for creating in dependence upon the~~  
travel record, an immigration admissions form for a destination country;  
~~means, recorded on the recording medium, for validating, by the international~~  
travel server separately from any immigration computer of the destination  
country, travel described in the travel record against admissions rules  
stored in an admissions rules database; and  
~~means, recorded on the recording medium, for submitting the immigration~~  
admissions form to an immigration admission forms database for the  
destination country.

30. (Original) The product of claim 29 wherein the internet-enabled device is a workstation in a kiosk at an airport.
31. (Original) The product of claim 29 wherein the internet-enabled device is a workstation installed in the back of a passenger chair in an airplane.
32. (Original) The product of claim 29 wherein the internet-enabled device is a personal computer.
33. (Original) The product of claim 29 wherein the internet-enabled device is a hand-held personal data administrator.
34. (Original) The product of claim 29 wherein the at least one internet connection is wireless.
35. (Original) The product of claim 29 wherein the travel record comprises travel data describing travel, the travel data including identification of a traveler and of a destination country.
36. (Original) The product of claim 29 wherein the international travel server is a

AUS20010333US1  
M/S AF

software application installed and operating on one or more computers, the software application further comprising software routines storing and retrieving travel records, validating travel described in travel records against admissions rules stored in admissions rules databases, and submitting to immigration databases immigration admissions forms prepared in dependence upon the travel records.

37. (Currently Amended) The product of claim 29 wherein ~~means, recorded on the recording medium, for~~ creating in dependence upon the travel record, an immigration admissions form for the destination country, further comprises ~~means for~~ reading travel data from a travel record and ~~means for~~ inserting the read travel data into an immigration admissions form.
38. (Currently Amended) The product of claim 29 wherein ~~means, recorded on the recording medium, for~~ submitting the immigration admissions form to an immigration admission forms database for the destination country further comprises ~~means for~~ communicating the forms as electronic data communications through at least one internet connection.
39. (Cancelled)
40. (Currently Amended) The product of claim ~~39~~29 wherein ~~means, recorded on the recording medium, for~~ validating the travel records further comprises ~~means for~~ comparing the travel described by travel data in the travel record to admissions rules governing the travel described by the travel data in the travel record and ~~means for~~ reporting to the traveler through the internet-enabled device a result of the comparison.
41. (Currently Amended) The product of claim 40 further comprising ~~means, recorded on the recording medium, for~~ storing the result of the comparison in the travel record.

AUS20010333US1

M/S AF

42. (Original) The product of claim 29 wherein the travel record comprises a travel record form, wherein the travel record form is dependent upon admissions rules.
